

# Library Managers Report 2/23/16

---

- I received a new quote as we from Charter for Phones and Internet and have included them with the package. They are going to install on April 18, or whenever our tech person might be available. Since there are no early termination fees, no contract, same phone numbers and a savings of over \$50.00 a month, I felt we could not go wrong with starting ASAP. The Press Release for April then is the Library now has 100meg Broadband High Speed Internet.
- I am still pursuing E-Rate but doing so, just to get everything up to date if we decide to pursue CENIC in the future. I have updated the FCC Number and am getting a new or updated not sure at this time, USAC login the FCC was very helpful with all of this.
- The Movie this month was “Singing in the Rain” brought in eleven patrons and so it looks to be slowly catching on. We plan to show the New Star Wars Movie next month, so we can perhaps catch a few more people.
- As most of you probably know I have been horribly sick the last few months, it has come to my attention thru my Doctor that perhaps my office still has a toxic black mold issue or at the least my immune system has been tragically affected. I have called Golden State once to see if Joe could come and check out what I think is an exhaust in my office, but he hasn’t gotten back to me. I would really like the air quality check in my office for peace of mind if nothing else.
- I applied for the State LSTA Grant this year in hopes of getting our digitization project funded. I have to pitch my idea on the phone on Monday. I am more than excited, but unfortunately I have no other funding to offer and I will need to provide some In Kind monies to get this Grant. I was going to pitch it to you as a board today since this will be some of next year’s money and on that budget. I don’t believe with LSTA it has to be a great amount. I am hoping as well that I can get some funding from the Foundation if they meet before the Grant Writing is over.
